Case Study

THE CLIENT

Amy Kelly Owner

eWedding is a US based website that provide a feature of creating a website that will help you to plan and share the details of wedding day. Website offers everything you need to make your wedding website a success.

THE IDEA

The idea is to create a website where user can create his/her wedding website Idea is to develop a website offer everything that user need to make his/her wedding website a success. Included features like Photos Album, Polls and Quiz, unlimited updates, Audio & video etc. The idea is to make an e-commerce website where user can select a package If you want or need more features and functionality.

REQUIREMENTS

- The website is like that from where user can create their wedding website.

- Website should consist of a signup form where user can register to create his/her own wedding website.
- Website should have a pool of template from where users have to select the desired template.
- The website have to be design in a manner that it keep balance in the Graphical User Interface and consistent in different browsers.
- There should be an admin panel from where admin can update blog and news on daily basis.
- From Free to Platinum, we offer a package that meets your needs. If people want or need more features and functionality, they have to select a package.
- Website consists of a feature like photo album, polls quiz, event, mailing list, etc.

HOW CONSAGOUS HELPED

Carefully studying the requirements, Consagous Technologies Pvt. Ltd. laid out a well define design architecture. The entire project was divided into shorter modules with specific deadlines. The cost effective end-to-end solutions offered to Client comprised of following measures:

- Engaging a dedicated team of qualified professionals to achieve the target.
- We have tried to get all possible requirements and specification according to client's need.

- We have deployed all the necessary features of Client and tried to prepare solution as per client need.
- The entire solution is made at the consagous development center using the php which is easy and more users friendly. Wordpress (cms) is used for admin blog.
- We provide an opportunity to people to plan their wedding online.

OUTCOME

- We were able to communicate our wedding plans with our family and friends by creating a centralized website with loads of information.
- This was the most effective way to share our wedding information with all of our guests on a daily basis, if needed which many of them are many miles away.
- This website has a better connect with the need of user and give a better way to arrange the information in proper manner.
