

ABSTRACT

Eagle eye is an efficient tool for management and monitoring of marketing team. As its name shows, it tracks the entire marketing team. The tracking system helps to track the location, real time monitoring and top level updating. We can keep a record of updating from marketing and sales team. The medical representatives can reduce their work with the help of eagle eye. We provide PDA device for every team member. It gives a standard approach for the company in front of doctors and others. Eagle eye help to explain the details of medicine so easily and also it helps to take the work orders. It can also help to issue invoice for the medicine orders.

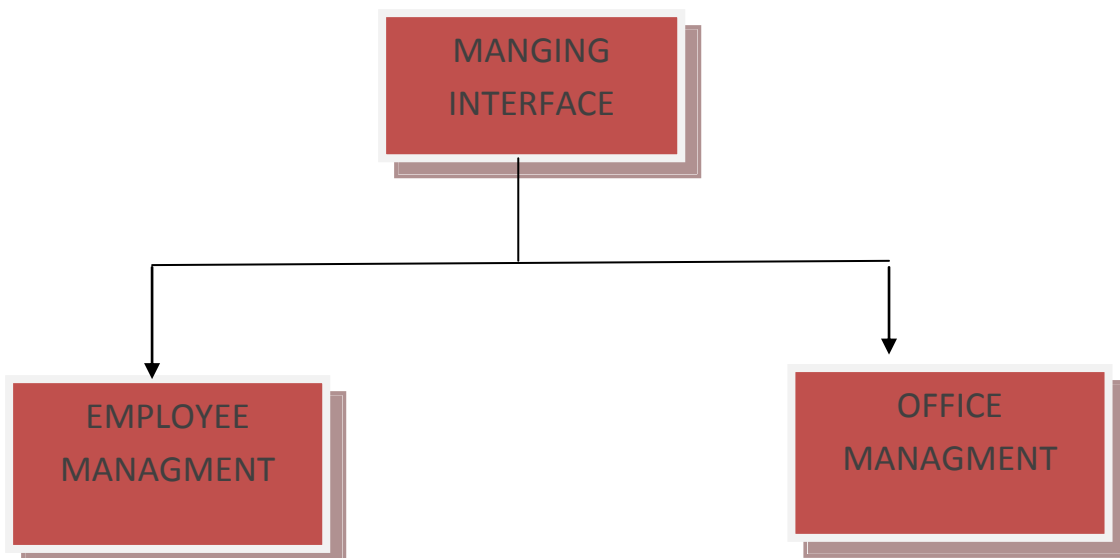

EAGLE EYE

1. MANAGING INTERFACE
2. EMPLOYEE INTERFACE.

Managing interface

Managing interface contains tools for the managing people of company. All the major and minor jobs of company can be controlled through a monitor placed at your office.

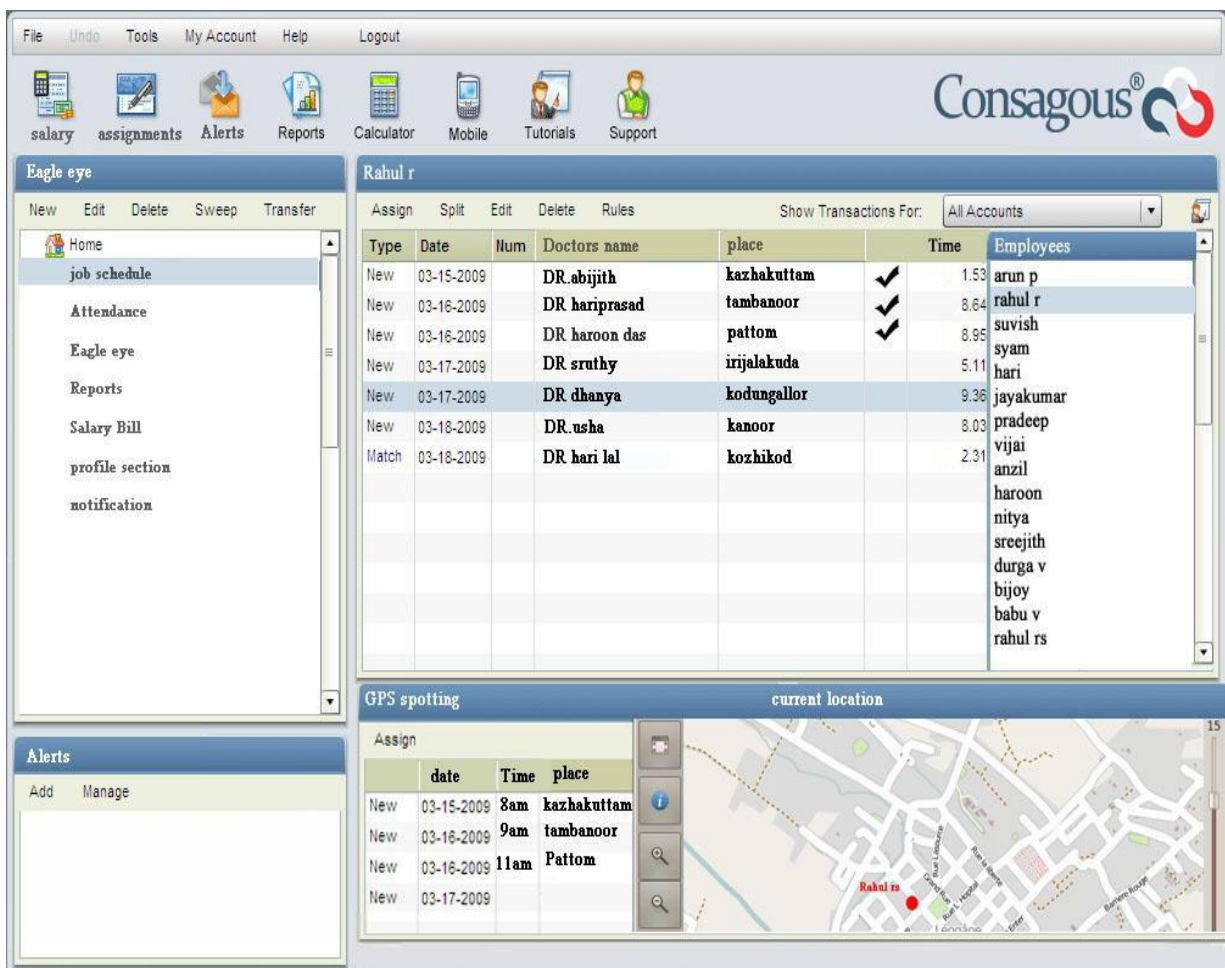

Employee management

This window shows full details of each employee like the time of sign in, job schedules, location of employee (GPS), total working hours till date, and salary details.

Office management

It gives all details like salary, total Doctors visited, medical shops successful communication and ranking of employees will be done with their performance. Doctors list will be maintained with their loyalty basis and category. All the feed backs from conference with doctors will be given by employee through PDA which will be saved at master server.

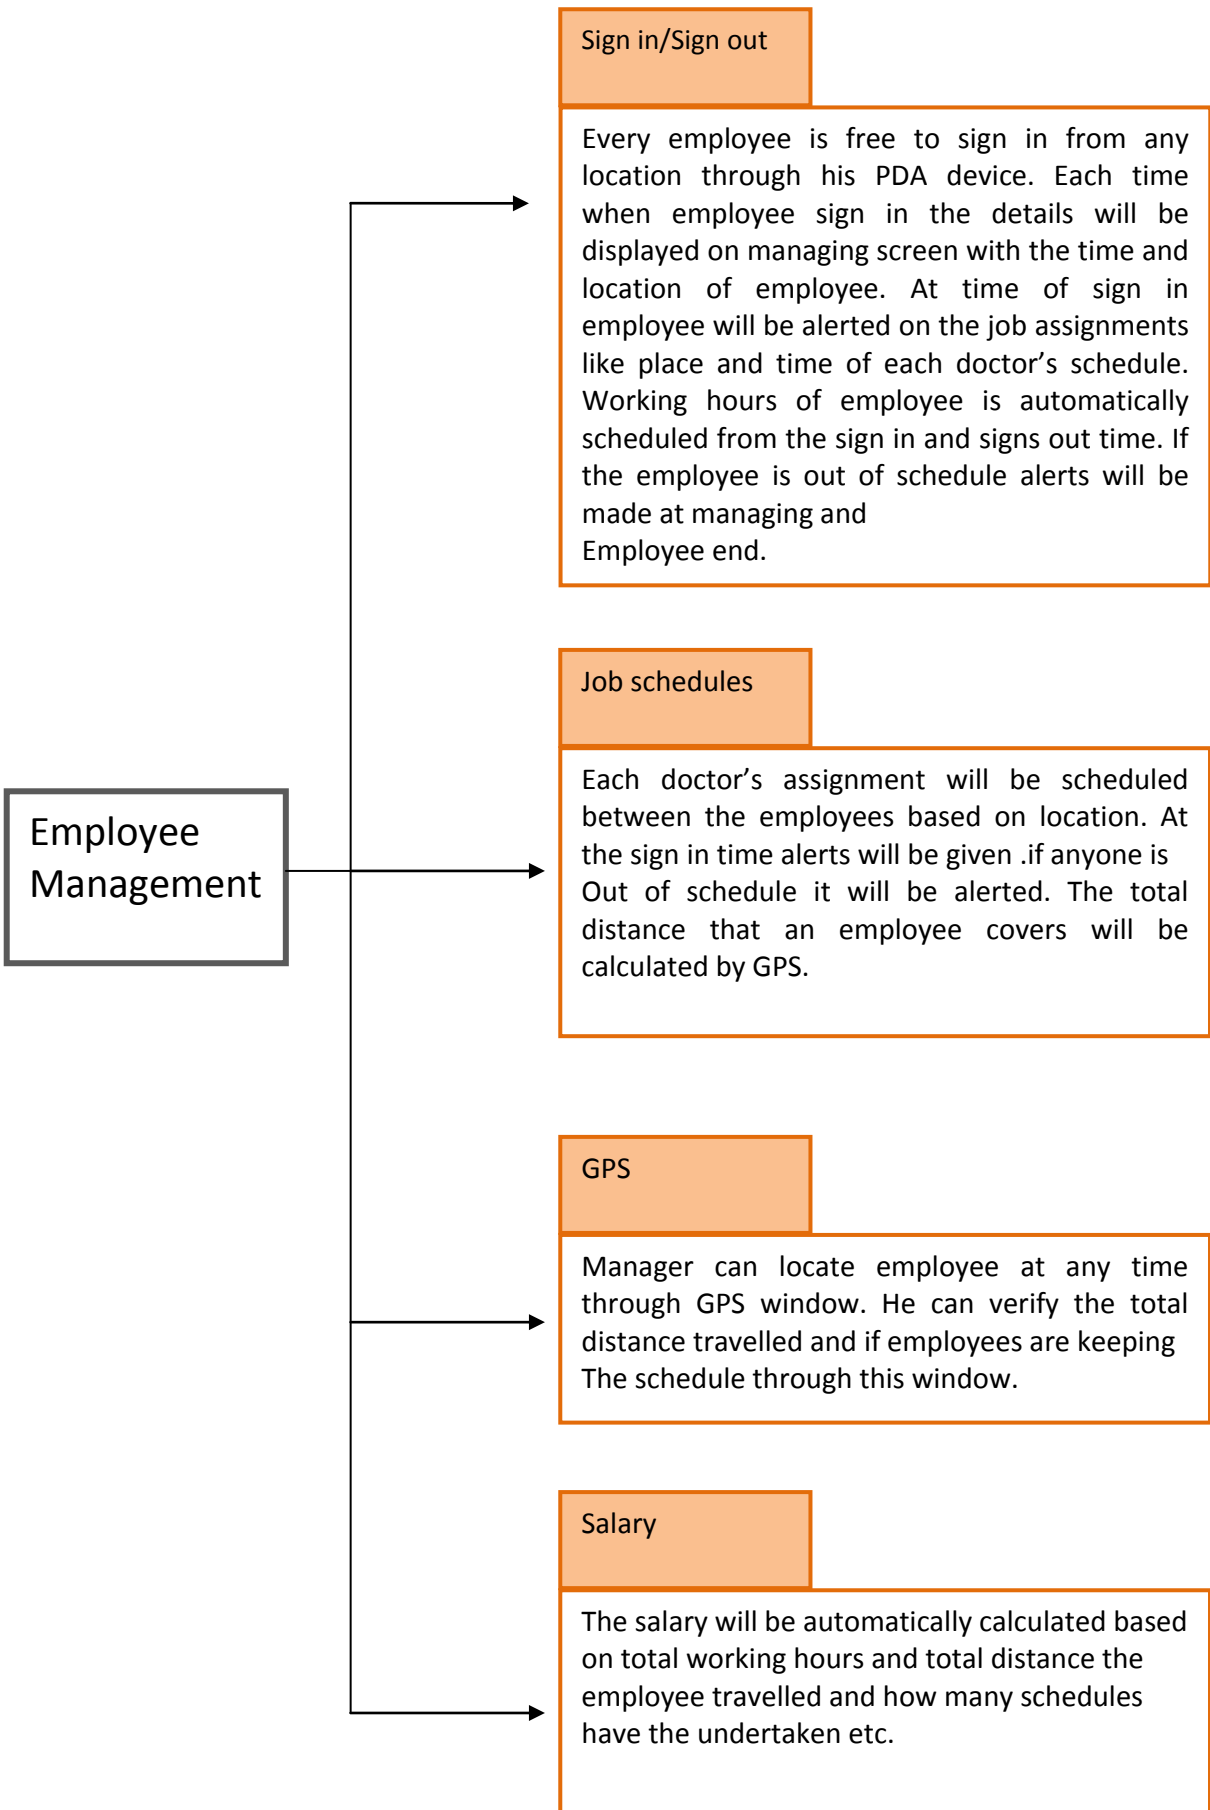

The screenshot displays the Eagle Eye software interface. At the top, there is a menu bar with options: File, Undo, Tools, My Account, Help, and Logout. Below the menu is a toolbar with icons for salary, assignments, Alerts, Reports, Calculator, Mobile, Tutorials, and Support. The main window is divided into several sections:

- Eagle eye sidebar:** Contains navigation options like Home, job schedule, Attendance, Eagle eye, Reports, Salary Bill, profile section, and notification.
- Employee Management Table:** A table with columns: Type, Date, Num, Doctors name, place, Time, and Employees. It lists various transactions for employee 'Rahul r'.
- Alerts Section:** Includes 'Add' and 'Manage' buttons and a list of alerts.
- GPS spotting Section:** Includes a 'current location' map and a table for assigning spots.
